

Linuxtag (24-27.06.09) Berlin, Germany - Project Submission

[http://wiki.linuxtag.org/w/fp:Call for Projects](http://wiki.linuxtag.org/w/fp:Call_for_Projects)

General Information

Project Title: Sugar - a platform for learning learning

Category: Education

Project URL: <http://sugarlabs.org>

Project Description

(This description is used by the project committee to get an overall overview about the project. If the project get accepted this descriptions will be published on the official website and the LinuxTag-Journal.)

English (short): Sugar Labs, a volunteer-driven, nonprofit organization, is a support base and gathering place for the community of educators and developers to create, extend, and teach with the Sugar learning platform.

English: Sugar Labs, a volunteer-driven, nonprofit organization is a support base and gathering place for the community of educators and developers to create, extend, and teach with the Sugar learning platform. Designed from the ground up for children, Sugar is used by almost one-million students aged 5 to 12 in over 40 countries every school day. Originally developed by the One Laptop Per Child project (www.laptop.org), Sugar is now available on the One Laptop Per Child XO-1, classroom PCs, and netbook computers. Sugar Labs is a member project of the Software Freedom Conservancy (conservancy.softwarefreedom.org). For more information, please visit www.sugarlabs.org.
