Meet the XO-duo, the device that's connecting classrooms across Australia.

The new XO-duo carries the same great features of the original low-cost, low-power, rugged and connected device designed for learning, but now comes with the addition of a touch screen. Designed for children, the XO-duo comes pre-loaded with software solely designed for education.

Learn for Change

One Academy is a supportive framework that makes learning XO-related skills fun for adults and children. It builds confidence in adults and children to own the project and helps ensure One Education succeeds in the classroom and in the community.

Featured Story

Berserker Street State School testimonial

“We are so excited to be part of the One Laptop Per Child initiative. We are a low SES school and have been searching for years for a way to bring ICTs to our families. Within two weeks of finding out about this amazing program we were able to source over $20,000 from three local donors and the first XOs were on their way. The excitement in the school is palpable...

One Education is providing the tools and resources for primary school children to engage with technology like never before. It provides teachers and students with the means to connect with each other and to develop skills that are a pathway to our nation's continuing prosperity.

Malcolm Turnbull
Minister for Communications

Schools Dashboard

Manage your school’s XOs from one dashboard!

The One Education Dashboard allows Principals to allocate XOs to adults and to classrooms. The flexible and simple design is crucial to providing schools with the visibility to see where their XOs have been distributed and registering teachers for One Academy.
